# **GEOMETRIC FORMED TILES**

Progressive Designs & Innovative Products

*Discover Natamar's New Collection, offering progressive designs in Tiles and Mosaics. Through extensive R&D, Natamar has developed a method allowing for precise cutting of tiles into various geometric forms, including Hexagons, Diamonds, Triangles, and more, without errors and at mass production scale.*

*This innovative method provides natural stone tile designers with ample creative space, all while ensuring sustainable production costs through mass production capabilities. Natamar can now craft new products in various shapes requested by customers or designers with adjustments to this groundbreaking technique.*

### **PRODUCTION**

*High Quality, Cost Effectiveness, and  
Timely Delivery*

*By harnessing the latest technologies and applying lean production techniques, NATAMAR has optimized its production lines, achieving industry-leading efficiency, quality, and on-time delivery through innovative collaborations with machine manufacturers.*

### **Unique Colors of OUR TRAVERTINE**

*NATAMAR's Travertine raw material stands out not only in structure but also in color and character compared to other regional materials. We've leveraged these differences to create unique selections, implementing exclusive techniques in the production process to standardize stone quality and color continuity. This differentiation provides NATAMAR and its market partners with a significant advantage.*
